Biomea Fusion Announces Poster Presentation of Phase 1 Results for BMF-650, its Investigational Next-Generation Oral Small Molecule GLP-1 Receptor Agonist, at ObesityWeek® 2026

November 10, 2026

SAN CARLOS, Calif., Nov. 10, 2026 (GLOBE NEWSWIRE) -- Biomea Fusion, Inc. (“Biomea”) (Nasdaq: BMEA), a clinical-stage biopharmaceutical company focused on diabetes and obesity, today announced that it will present Phase 1 clinical results for BMF-650, its investigational next-generation oral small molecule GLP-1 receptor agonist, at ObesityWeek® 2026. The conference will take place November 14–17, 2026, at the Gaylord National Resort & Convention Center in National Harbor, Maryland.

Presentation Details
Title: First-In-Human Study Results for BMF-650 a Small Molecule Oral GLP-1 Receptor Agonist
Session: Obesity-Related Complications & Multimorbidity
Poster Number: Poster 828
Presenter: Thorsten A. Kirschberg, Ph.D.
Session Date/Time: Monday, November 16, 2026, at 2:30 p.m. – 3:30 p.m. ET

After the conference concludes, the poster will be available in the Investors & Media section of the company’s website.

About Biomea Fusion
Biomea Fusion is a clinical-stage biopharmaceutical company advancing oral small molecule therapies, icovamenib and BMF-650, for diabetes and obesity. These programs target metabolic disorders, a global health challenge affecting nearly half of Americans and one-fifth of the world’s population. Biomea’s mission is to deliver transformative treatments that restore health for patients living with diabetes, obesity and related conditions. We aim to cure.
