

Biomea Fusion to Host Conference Call and Webcast on Wednesday, October 30th at 4:30 pm ET to Announce Our Lead Clinical Candidate, BMF-650, a Next-Generation, Oral Small-Molecule GLP-1 Receptor Agonist and Preclinical Data Combining BMF-219 with a GLP-1 RA-Based Therapy

October 15, 2024

REDWOOD CITY, Calif., Oct. 15, 2024 (GLOBE NEWSWIRE) -- Biomea Fusion, Inc. ("Biomea") (Nasdaq: BMEA), a clinical-stage biopharmaceutical company dedicated to discovering and developing oral covalent small molecules to treat and improve the lives of patients with diabetes, obesity, and genetically defined cancers, today announced that it will host a conference call and webcast on Wednesday, October 30th at 4:30 pm ET to announce our lead clinical candidate, BMF-650 – a next-generation, potent, selective, oral small-molecule GLP-1 receptor agonist (GLP-1 RA) and to share results of preclinical studies investigating the synergistic benefits of combining BMF-219 with a GLP-1 RA-based therapy.

Conference Call and Webcast Details

Webcast of Biomea's investor update on Wednesday, October 30th at 4 pm ET will be available to registered attendees under the Investors and Media section of the company's website at <https://investors.biomeafusion.com/news-events/events>.

A replay of the presentation will be archived on Biomea's site following the event.

About Obesity

Obesity is a chronic disease necessitating long-term management, associated with diminished life expectancy and a spectrum of severe health complications. These include metabolic disorders such as type 2 diabetes and non-alcoholic fatty liver disease; cardiovascular diseases like heart attack, stroke, and hypertension; and increased risks of chronic kidney disease, certain cancers, and chronic inflammation. The CDC estimates that over 40% of adults in the U.S. are considered obese, contributing to a significant burden on public health and healthcare systems. The direct medical care costs of obesity are estimated to total \$289 billion per year in the U.S. Globally, over 650 million adults are living with obesity, and these numbers are steadily rising.

About GLP-1 Receptor Agonists

Glucagon-like peptide-1 (GLP-1) is a naturally occurring incretin hormone that plays a vital role in glucose homeostasis and appetite regulation. GLP-1 receptor agonists are a class of medications that bind to and activate GLP-1 receptors, mimicking the effects of native GLP-1. These agents have demonstrated robust clinical efficacy in improving glycemic control, promoting weight loss, and enhancing insulin sensitivity in individuals with type 2 diabetes and obesity.

About Biomea Fusion

Biomea Fusion is a clinical-stage biopharmaceutical company focused on the discovery and development of oral covalent small molecules to improve the lives of patients with diabetes, obesity, and genetically defined cancers. A covalent small molecule is a synthetic compound that forms a permanent bond to its target protein and offers a number of potential advantages over conventional non-covalent drugs, including greater target selectivity, lower drug exposure, and the ability to drive a deeper, more durable response.

We are utilizing our proprietary FUSION™ System to discover, design, and develop a pipeline of next-generation covalent-binding small-molecule medicines designed to maximize clinical benefit for patients. We aim to have an outsized impact on the treatment of disease for the patients we serve. We aim to cure.

Forward-Looking Statements

Statements we make in this press release may include statements which are not historical facts and are considered forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended (the "Securities Act"), and Section 21E of the Securities Exchange Act of 1934, as amended (the "Exchange Act"). These statements may be identified by words such as "aims," "anticipates," "believes," "could," "estimates," "expects," "forecasts," "goal," "intends," "may," "plans," "possible," "potential," "seeks," "will," and variations of these words or similar expressions that are intended to identify forward-looking statements. Any such statements in this press release that are not statements of historical fact, including statements regarding the clinical and therapeutic potential of our product candidates and development programs, may be deemed to be forward-looking statements. We intend these forward-looking statements to be covered by the safe harbor provisions for forward-looking statements contained in Section 27A of the Securities Act and Section 21E of the Exchange Act and are making this statement for purposes of complying with those safe harbor provisions.

Any forward-looking statements in this press release are based on our current expectations, estimates and projections only as of the date of this release and are subject to a number of risks and uncertainties that could cause actual results to differ materially and adversely from those set forth in or implied by such forward-looking statements, including the risk that we may encounter delays in preclinical or clinical development, patient enrollment and in the initiation, conduct and completion of our ongoing and planned clinical trials and other research and development activities. These risks concerning Biomea Fusion's business and operations are described in additional detail in its periodic filings with the U.S. Securities and Exchange Commission (the "SEC"), including its most recent periodic report filed with the SEC and subsequent filings thereafter. Biomea Fusion

explicitly disclaims any obligation to update any forward-looking statements except to the extent required by law.
